AMAPACKER-A

The AMAPACKER-A as a fully-automatic case packer which automatically loads cartons or bundles in one or more layers.The machine can pack up to 300 boxes per minutes autonomously while all inspection & aggregation processes are done in the background.

## The AMAPACKER-A fully-automatic case packer

The AMAPACKER-A is a state-of-the-art, fully-automatic case packing solution that eliminates the need for human intervention. This advanced machine not only loads cartons or bundles into flat shipping cases but also automatically erects the flat cartons before filling them, autonomously managing one or more layers with precision. Gone are the days of relying on operators, as the AMAPACKER-A operates independently, following a groundbreaking ergonomic design for seamless functionality.

With a throughput rate of up to 300 boxes per minute, the AMAPACKER-A handles all aggregation processes in the background, simultaneously ensuring compliance with legal requirements. This machine represents the epitome of automation in the packaging industry, optimizing efficiency while meeting regulatory standards effortlessly.

The AMAPACKER-A introduces a fresh approach, featuring a robust machinery configuration driven by cutting-edge servo

drives, integrated seamlessly with a comprehensive aggregation system. Constructed entirely from stainless steel and aluminum, adhering to the highest design standards, this machine boasts both durability and hygiene. Its compact footprint also makes it suitable for retrofitting into existing packaging lines, maximizing versatility.
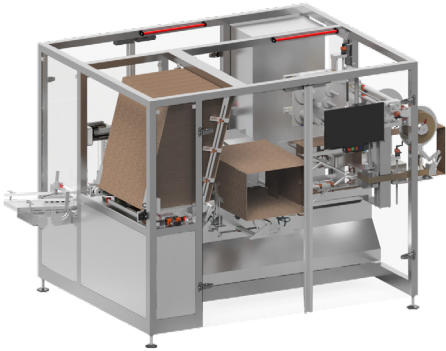

Operational costs are kept to a minimum, as the AMAPACKER-A consumes a minimal volume of compressed air and requires only few cost-effective format parts. Format changes can be executed swiftly, without the need for specialized tools, ensuring minimal downtime. Furthermore, the machine offers a range of infeed and outfeed options, including automatic labeling and sealing of completed flat shipping cases, further streamlining the packaging process.
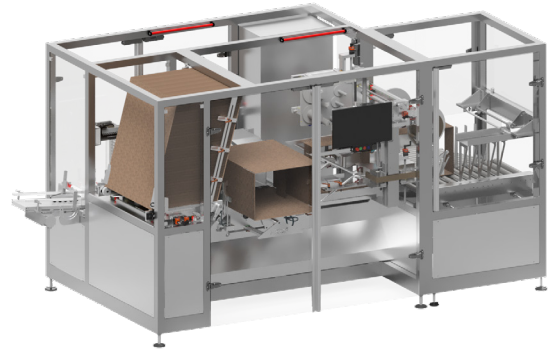

AMAPACKER-A

AMAPACKER-A Models

AMAPACKER-A300

The AMAPACKER A300 is the baseline casepacker which offers the ideal balance between packaging efficiency and short changeover times. The machine is prepared to be easily equipped with the necessary equipment for aggregation.

- Machine performance up to 300 pcs/min
- Machine width 2450 mm
- Machine depth 1973 mm
- Folding Box Width 30-180 mm
- Folding Box Depth 55-200mm
- Folding Box Height 15-90mm
- Shipping Case Width 250-540mm
- Shipping Case Depth 180 up to 400mm
- Shipping Case Height 150-400mm

AMAPACKER A300R

The AMAPACKER A300R offers the same base features as the AMAPACKER-A300 while offering an automatic rejection station for substandard shipping cartons.

- Machine performance up to 300 pcs/min
- Machine width 3555 mm
- Machine depth 1973 mm
- Folding Box Width 30-180 mm
- Folding Box Depth 55-200mm
- Folding Box Height 15-90mm
- Shipping Case Width 250-540mm
- Shipping Case Depth 180 up to 400mm
- Shipping Case Height 150-400mm
